EDUCATION

VELLORE INSTITUTE OF TECHNOLOGY

Bachelor of Technology

Major in Computer Science Engineering

Cumulative GPA: 7.98/10.0

Relevant Coursework: Data Structures, Software Engineering; System Design; Databases; OOPs

Bhopal, Madhya Pradesh

June 2021 - July 2025

WORK EXPERIENCE

Junior Salesforce Developer

May 2025 – September 2025

ECTG - Flight Centre Travel Group

Noida, Delhi NCR

- Designed and implemented Salesforce automations using **Flows**, such as creating auto-reply emails for incoming queries and automatically generating new cases in Salesforce
- Performed **testing of Salesforce functionalities**, ensuring correct field values, accurate calculation of overall scores, and built **Formula Fields** to validate business logic
- Collaborated with **Australia-based teams** to gather requirements and ensure smooth **project delivery** by performing **Salesforce administration** tasks, including **user management** and **email-to-case configuration**

PROJECTS

OH-MY-GOSH (Mini Shell in Go) - [GitHub](#)

February 2026

- Built a **custom Unix-like shell** that reads and executes user commands, supporting built-in commands (cd, pwd, echo, exit) and running external programs via \$PATH
- Added key features like **input/output redirection**, **multi-command pipelines**, **command history with file persistence**, and **tab-based autocompletion**
- Structured and refactored the code for **scalability and maintainability**, demonstrating strong understanding of **core OS concepts and real-world command-line tooling**

MOCK YOU UP (An AI-Powered Career Assistant) - myu.shreyapandey.me | [GitHub](#)

October 2025

- Unified fragmented job-search process into a single platform where users generate industry-specific resumes, tailored cover letters, and practice interviews which **eliminates the need for multiple paid subscriptions and generic templates**
- Integrated Groq's LPU inference over traditional GPT APIs to **deliver instant AI feedback** during resume editing, **solving the "wait and refresh" problem** that frustrates users in existing tools
- Designed **contextual AI system that learns** user's industry and experience once, then **adapts all features automatically** like resume suggestions, interview questions, and salary insights are **personalized without re-entering information**

PORTFOLIO (portfolio.exe) - shreyapandey.me | [GitHub](#)

November 2025

- A functional **Windows 10 operating system inspired portfolio website** running on browser with features like Terminal, Browser, File Explorer and basic OS tools
- Added a couple of **easter eggs and deployed** it on Vercel which routes through the personal domain

TASKIFY (Productivity Optimization Tool) - taskify.shreyapandey.me | [GitHub](#)

November 2024

- Created a **sticky-note inspired task app** to boost productivity
- Developed and integrated key features in Taskify, including secure **user authentication**, an intuitive task creation workflow, and a **Pomodoro timer to boost productivity** and streamline digital organization
- Boosted deployment efficiency by integrating Docker and Vercel, automating **containerization and environment setup**, resulting in low setup time and streamlined application deployment process

ACHIEVEMENTS

Programming Languages: Go, Java, Javascript, SQL

Frontend Technologies: HTML5, CSS3, NextJS

Backend/DevOps: DataDog, Docker, NodeJS, Git, CI/CD, Azure (basics)

Other Relevant Skills: DSA, OOPs, DBMS

Competitive Coding: [Leetcode - 126,625](#)

Certifications & Training: [AWS Certified Cloud Practitioner](#), Google - The Bits and Bytes of Computer Networking

Awards: University finalists for the Smart India Hackathon 2024, [Won the VIT Bhopal Industry Conclave project expo](#)
